Please handle this one the same as the other one that Alexis forwarded (although I can't tell if Jason and Rob also received this one).

Subject: Rosemont Copper Mine, Arizona

Please continue to work tirelessly to make our Rosemont Copper mine a reality. It is obvious that Tucson is struggling economically, and a solution to our hardships is the creation of more jobs in our community.

My great-grandfather, grandfather, uncles and most of my cousins all worked in mining. They all had the kind of good paying jobs that allowed them to live the lives that they wanted to live. Today, we have too many families forced to subsist on welfare because there's simply no opportunity. The lucky few who do find jobs are flipping burgers. This pattern has gone on for too long.

Even though we are desperate for jobs and Rosemont is eager to provide those jobs, thanks to the attention to detail that your agency and Rosemont Copper have provided, it is proven that these jobs will not come at the expense of the Environment.

We are so close to seeing this important mine become a reality. Let's push forward to the finish line and see this through to the end.
